§ 3261.22

this section. If your operations such as redrilling, deepening, drilling a new directional leg, or plugging back a well would significantly change your approved permit, BLM may require you to send us a new drilling permit (see 43 CFR 3261.13). A significant change would be, for example, redrilling the well to a completely different target, especially a target in an unknown area.

- (b) If your changed drilling operation would cause additional surface disturbance, we may also require you to submit an amended operations plan.
- (c) If immediate action is required to properly continue drilling operations, or to protect public health, safety, property or the environment, you only need BLM's verbal approval to change an approved drilling operation. However, you must submit a written sundry notice within 48 hours after we verbally approve your change.

§ 3261.22 How do I get approval for subsequent well operations?

Send us a sundry notice describing your proposed operation. For some routine work, such as cleanouts, surveys, or general maintenance (see 43 CFR 3264.11(b)), we may waive the sundry notice requirement. Contact your local BLM office to ask about waivers. Unless you receive a waiver, you must submit a sundry notice. Do not start your operations until we grant a waiver or approve the sundry notice.

Subpart 3262—Conducting Drilling Operations

§ 3262.10 What operational requirements must I meet when drilling a well?

- (a) When drilling a well, you must:
- (1) Keep the well under control at all times;
- (2) Conduct training during your operation which ensures your personnel are capable of performing emergency procedures quickly and effectively;
- (3) Use properly maintained equipment; and
- (4) Use operational practices which allow for quick and effective emergency response.
- (b) You must use sound engineering principles and take into account all pertinent data when:

- (1) Selecting drilling fluid types and weights;
- (2) Designing a system to control fluid temperatures;
- (3) Designing blowout prevention equipment; and
- (4) Designing a casing and cementing program.
- (c) Your operation must always comply with the requirements of 43 CFR 3200.4.

§ 3262.11 What environmental requirements must I meet when drilling a well?

- (a) You must conduct your operations to:
- (1) Protect the quality of surface and subsurface water, air, natural resources, wildlife, soil, vegetation, and natural history;
- (2) Protect the quality of cultural, scenic, and recreational resources;
- (3) Accommodate, as necessary, other land uses:
 - (4) Minimize noise; and
- (5) Prevent property damage and unnecessary or undue degradation of the lands.
- (b) You must remove or, with BLM's approval, properly store all equipment and materials that are not in use.
- (c) You must retain all fluids from drilling and testing the well in properly designed pits, sumps, or tanks.
- (d) When you no longer need a pit or sump, you must abandon it and restore the site as we direct you to.
- (e) We may require you to give us a contingency plan showing how you will protect public health and safety, property, and the environment.

§ 3262.12 Must I post a sign at every well?

Yes. Before you begin drilling a well, you must post a sign in a conspicuous place and keep it there throughout operations until the well site is reclaimed. Put the following information on the sign:

- (a) The lessee or operator's name;
- (b) Lease serial number;
- (c) Well number; and
- (d) Well location described by section, township, range, and quarter-quarter-section.
